

PHARIO 360°

Compact shock absorber for via ferrata equipped with a swivel that solves possible tangling of the flexible arms. With this via ferrata set, you won't be distracted by anything and you'll be able to concentrate fully on climbing and enjoying the beauty of nature.

DESCRIPTION

Suitable for users weighing from 40 kg (without equipment) to 120 kg (including equipment).

Ergonomically shaped PALM Keylock carabiners (EN 12275, type K) with wear indicator work smoothly and reliably, they are easy to use for both children and adults.

Elastic arms are 15 mm wide and asymmetrical, their variable length prevents strangulation of the head or limbs in the event of an accident.

50,000 extensions, that's how many cycles our elastic arms have undergone in development tests; your movement on via ferratas will be safe.

Using the 15 mm wide tie-in loop made of durable polyester, the via ferrata set can be easily attached with the cow knot to all types of harnesses used on via ferratas or in rope parks.

New minimalist 27 mm wide very low water absorption of the shock absorber material eliminates the increase in impact force on the human body in the event of a potential fall in wet conditions. Shock absorber webbing is folded in a compact velcro package that protects it well against external influences.

Miniature swivel made of aluminum alloy reduces tangling of the elastic arms.

KEY FEATURES

- swivel reducing tangling of the elastic arms
- lightweight and compact
- complies with the new standard EN 958:2024

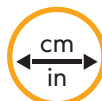

STANDARDS

CE 1019

EN 958

MATERIALS

- 58 % aluminum alloy
- 22 % PES
- 16 % HMPE
- 3 % TPU
- 1 % stainless steel

TECHNICAL DATA

COMPARISON

PHARIO 360° (C2321BX00) – PHARIO 360° (C2318YB00)

- the width of the HMPE shock absorber is reduced from 27 mm to 20 mm
- reduced shock absorber volume in a smaller, more compact velcro pocket
- lightweight swivel made of aluminum alloy
- asymmetric elastic arms

PHARIO 360° (C2318YB00)

MAINTENANCE

Lifetime of this product depends on the frequency and the environment (salt, sand, moisture, chemicals, etc.) in which is used. Without taking wear or mechanical damage into account and in compliance with the conditions specified in the instructions for use this product may be used 15 years from the date of production and 10 years from the date of the first use. However mechanical damage can occur during the first use, which can limit the lifetime of this products only to its first use.

beware of salt

beware of UV

beware of chemicals

washing

OTHER VIEWS

Lightweight and compact size.

Fall indicator label helps to detect if the shock absorber has already been activated and needs to be replaced.

When you run out of power on the via ferrata, you'll appreciate the central rest loop with a strength of 12 kN.
