

VISION ALPINE

Wire-gate quickdraw with 60 cm Dyneema® sling for trad climbing.
Designed with focus on light weight and excellent handling.

DESCRIPTION

Wire gates do not freeze up in alpine and winter conditions and reduce a whip-lash effect on the gate in the case of hitting a rock.

Ideal for lightweight style, trad climbing and winter ascents.

Sling allows to use the quickdraw in two lengths depending on the style of the route.

Longer sling reduces the rope drag in the carabiners.

Two hot forged wire gate carabiners VISION perfectly fits into pitons, bolt hangers, or cam slings.

Anodized finishing increases the corrosion resistance.

8 mm wide and 60 cm long Dyneema® sling makes it perfect for use in wet conditions at alpine terrain.

KEY FEATURES

- large rope-bearing surface reduces the wear of the rope
- compact shape of the carabiners for comfortable handling
- adjustable length
